Help Us Build More Renewable Energy in Brighton and beyond!

BRIGHTON ENERGY COOPERATIVE

New Projects and Membership information 2018/19
INTRODUCTION

In 2010 we started off on a grand adventure: community-funded renewable energy in Brighton and Hove. A few people scoffed at the idea (“a co-operative?”) but it resonated with many more. At our first meeting 60 people crammed into a local hall to show their support for this simple idea. Brighton Energy Coop was born.

Eight years later I’m pleased to welcome you to our most recent fundraising offer. Since our humble beginnings we’ve raised more than £1,900,000 from people in Brighton and beyond. We’ve installed (and now operate) twenty-eight large PV arrays, paid our members 5% interest each year, and provided funds for many other low-carbon initiatives in our area.

Brighton Energy Coop is part of a global phenomena of community energy. In the UK alone the sector is worth £190 million with 30,000 people investing in 222 community energy groups. Altogether the UK movement has built 188 MW of renewable energy capacity.

As a proud part of this groundswell, the document you’re reading outlines Brighton Energy Coop’s latest evolution - and where we’re going next.

It’s been an incredible journey, and it’s such an inspiration to have so many people as part of what we are doing. You can join them by becoming a member and adding your voice to the community energy revolution that’s building in Brighton - and beyond.

Share Offer Summary

Share offer opens: 4/2/19  
Minimum investment: £300  
Maximum investment: £100,000  
Minimum target: £148,500  
Maximum target: £297,000  
Deadline: 31/3/2019

The Community Shares Standard Mark is awarded by the Community Shares Unit to share offers that meet national standards of good practice. These standards ensure that:

• The offer document and application form are easy to understand.

• You are provided with all the facts you need to make an informed decision.

• The facts are supported by the business plan for the society.

• Nothing in the documents is purposely incorrect, confusing or misleading. Societies are asked to sign a Code of Practice requiring them, among other things, to give the public a right of complaint to the Community Shares Unit. For more information about Community Shares, the Community Shares Standard Mark and the Community Shares Unit please visit: www.communityshares.org.uk

What is the Community Shares Standard Mark?
OUR NEW PROJECTS

Carden Primary School
System Size: 180kWp

Tucked in a high corner of Brighton’s Hollingbury, Carden Primary School’s south-facing roofs are a great home for BEC’s proposed 180kWp solar system. Our locally-owned green energy system will build on the school’s already strong links with the community, and provide clean power to the teaching staff and 400 three to eleven year olds.

Coldean Primary School
System Size: 60kWp

Coldean Primary is a pioneer of Brighton & Hove City Council’s solar schools program. Our new 60kWp solar system will be a clean power plant on the school’s roofs, & will sit up the road from BEC’s existing solar system at Varley Halls, part of the University of Brighton campus.

Woodingdean Primary School
System Size: 60kWp

High up on the Sussex Downs, Woodingdean Primary School is also a partnership with Brighton and Hove City Council. Woodingdean will be a 60kWp system, and as well as providing educational resources to the children, our solar system will save the school thousands on their electricity bills each year.

Rudyard Kipling Primary School
System Size: 60kWp

Kids come first at Rudyard Kipling Primary; the positive, inspiring environment will be supported by a 60kWp solar array, allowing the school to put money back into helping every child succeed as a confident individual.
By buying shares you join Brighton Energy Coop you thus help us raise the money to finance the development, marketing and capital costs of our new projects.

Each project is assessed by the BEC team to ensure they are suitable to deliver a return sufficient to cover operations, maintenance, capital repayment costs and 5% interest. If these projects do not materialise we will return members’ monies, only issuing share certificates and investing capital in solar arrays that meet our investment criteria.

Who Can Invest?

We can accept applications for investment from individuals over the age of 16, and also from companies and organisations. Anyone buying shares on behalf of an organisation or a group of people must specify a person over 16 to act as their nominee and be listed in the share register on behalf of that group. You may purchase up to £100,000 of shares, the minimum being £300. Each share is worth £1.

Share Withdrawals

Shares are issued in tranches and in chronological order. Each tranche of shares is issued a share class - generally a share class represents the solar PV systems this investment has gone to fund. We make no distinction between share classes for the priority of withdrawals.

Note that BEC may undertake money-laundering checks as required by law.
How it Works

New Projects
BEC surveys, contacts and negotiates lease agreements with new solar landlords.

Community Investment
Community investors buy shares in BEC and become members.

Benefits to members and community
Members receive a 5% return on their investment. Part of our income also goes to pay for more projects to be developed and our community fund.

Installation
BEC builds and manages new solar PV systems, dealing with contracting with installers and the national grid.

By Purchasing Shares You Will:

• Gain an equal vote with every other member in how the Society is managed
• Ensure that you participate in the ownership of local renewable energy resources and benefit from the Government incentives
• Be eligible for any interest paid to members
• Contribute to developing a local energy supply, which aims to offer protection against fluctuations in energy supply and costs
• Contribute to the provision of renewable energy supplies for our area that, in turn, aims to retain benefits locally and strengthen the local economy
• Support a scalable model that is being replicated in other communities
• Help fight climate change and fossil fuel depletion
• Contribute to reducing CO2 emissions in the South East by saving more than 225 tonnes of CO2 per year

Risks

All investments and commercial activities carry risk. By buying shares you should weigh up financial risk and reward as you would with any other investment opportunity.

Those considering an investment should do so only after reading this document in full (including the section on risks below). If you are in any doubt then don’t hesitate to contact us or consult someone with financial experience before investing.

FUNDING OUR NEW PROJECTS

This fundraiser is to raise £297,000. The money will be spent on the installation of solar panels at our host sites, a project development fee for the BEC team, structural surveys and EPC certificates if required. The costs of installing and operating our new solar systems are set out below.

**Under-subscription**

We plan a phased installation on the four buildings detailed in this document; we will only install on those buildings for which we have the capital available. So if the offer is under subscribed then we will not install on those buildings for which we do not have the capital. Any remaining balance will be returned to those who have invested it.

**Over-subscription**

Subject to the directors discretion we plan to close the share offer once the maximum fund-raising target is reached.

Capital is to be sourced purely through the offer of shares; there are no grant or loans planned as part of the fund-raising process. As an organisation, BEC is 100% shareholder funded and has no loans or debt.

**Net cash flow after interest and share repayment**

|                        | £1,312  | £2,090  | £2,872  | £3,657  | £4,445  | £104,517 | £118,894 |
We expect that all investments will receive a return of 5% yearly interest. The Board aims to ensure that new projects are installed and generating electricity in the shortest practical time after funds have been raised from investors. However, investors should note that the first interest payments will only be made after the projects financed by new funds have generated an income for BEC for a minimum period of 12 months after installation.

Please note that the figures given in this share offer are provisional. There remain several key risks around our assumptions, so it’s important to read the risk factors below.

**Income**

We expect to generate and sell electricity produced by solar PV technology. This means there are two income streams: one based on Feed in Tariffs (FiTs - index-linked to the Retail Price Index) and one based on income through electricity sales to our host sites (also linked to RPI) or through exporting to the national grid. The FiT rate is currently circa 30-40% of the projected income from these projects, while sales/exports account for the rest.

**Outgoings**

The greatest costs are interest payments and capital repayment to members. Our projections are based on the assumption that capital is returned to members as the assets are gradually written off cover the 20-year life of the project. Other costs include maintenance (repairs, renewal or replacement of generating equipment), insurance, and BEC running expenses, which are all projected as increasing with RPI.

**Assumptions**

In our projections we have made the following assumptions:

- We intend to return all members’ capital back over 20 years at an average rate of 5% a year
- Performance degradation 1% pa. This is a normal degradation rate for solar PV.
- Retail Price Index (RPI) 3%. This is based on recent experience, but may during the life of the project be much higher if medium-to long-term historic trends are followed
- Interest payments to members are targeted to be 5%. This is based on a projection of profit and reserves in our bank account, but the Board will review project performance and determine what rate of interest is affordable on an annual basis. The Board expects 5% to be paid annually for the life of the project but this is not guaranteed. There may be periods when we don’t generate sufficient income to pay 5% interest due to sites not using all the electricity we generate but we will seek to minimise these through prudent selection of sites and sizing of arrays to match electricity usage
- Administration costs and running costs are estimates, again based on BEL’s experience
- Projections are based on the production efficiency of our existing systems

**Inheritance Tax Relief**

BEC Shares would generally be expected to attract Business Property Relief at rates of up to 100% for IHT purposes, provided the shares have been held for at least 2 years.

---

### FINANCIAL EXPECTATIONS & ASSUMPTIONS

#### WORKING CAPITAL REQUIREMENTS

Our projected end date for our latest round of installations is the 31st March 2019. To achieve this goal, our working capital requirements are:

RISKS

Not securing sites
The viability of a project depends upon obtaining a lease agreement with our host sites. Without a lease agreement we are obviously unable to proceed further. It is therefore a risk that the money we spend on developing some projects – prior to their lease signing - may be spent without a result.

Mitigation:
We anticipate being able to offer investors a targeted 5% return, and our financial projections make provision for project development costs. Any future installation will not proceed unless they are able to deliver this targeted 5%. Members’ funds will only be invested in new arrays and shares issued once the Board is confident that the array will deliver our target returns assessing viability. Note that we will not offer a site for community funding if it will not achieve what we consider a realistic interest rate to our members. Currently the Board seeks to maintain a 5% annual interest payment to members as provided to date but will consider supporting projects that can realise at least 4%.

General investment risks
BEC shares will not be transferable or traded on a recognised stock exchange, but they are buyable back by BEL. They will never increase in value above their nominal value of £1 each, but could fall in the event that BEC became financially unsustainable.

Risks associated with the assumptions
The RPI and cost increase rates are variable and unpredictable. Energy cost inflation may prove to be more volatile; it is expected to rise ahead of inflation but will probably do so in an irregular fashion. Revenue may be ahead of projections in the short term but fall back to the trend later, or vice versa; alternative energy sources might in the long run reduce energy cost in real terms and so reverse recent inflationary trends and erode profit. The Board will always review actual revenue and developing trends before making annual payments of interest or allocating grants.

Risks specific to Brighton Energy Ltd
Warranties and insurance will be in place in the event of mechanical breakdown of the equipment. Complete failure and loss of revenue through mechanical breakdown is reduced through the use of multiple inverters and the system is managed, through regular monitoring maintenance and repair, to minimise interruptions to supply.

Accidental and malicious damage to our equipment will also be covered under our insurance. BEL’s equipment is presently insured via NatureSave Brokers.

Renewable energy industry risks
Government policy towards renewable energy may change, although long-term commitments to FiTs make this unlikely, since FiTs are part of primary legislation and thus difficult to change. Throughout the operation of the FiT the Government has maintained the commitment to the process of ‘grandfathering’ which ensures that whatever tariff a project is registered for at the commencement of operation, the tariff will remain the same for the duration of the FiT period.

Projections are based on current FIT rates on the assumption that we are able to comply with preliminary registration through Ofgem ROO-FIT regulations. The Board is unable to guarantee that this will be possible.

Any changes to the FiT that occur before the end of the share issue period could result in BEC returning funds received from prospective members at the end of the Share Offer Period if those changes are judged to render a project unviable.
Brighton Energy Co-op is the trading name of Brighton Energy Limited, a Community Benefit Society (CBS) formed in 2010. As a CBS, Brighton Energy Co-op is democratically owned. Each member has one vote, regardless of the amount invested. Unlike a limited company, which is designed to benefit shareholders, a CBS is designed to benefit the wider community.

BEC is bound by its Rules, and the Directors serve in accordance with those Rules and receive no pay for the role of Director. Currently two Board members do receive remuneration as contractors providing administrative and project development services to BEC. BEC’s day-to-day operations are overseen by the Board which also bears ultimate accountability to BEC members for ensuring financial probity and achievement of the organisation’s objectives.

As a CBS, Brighton Energy Ltd complies with the requirements of the Cooperatives and Community Benefit Societies Act 2014 and is registered with and regulated by the Financial Conduct Authority. BEC shares are not traded. See www.brightonenergy.org.uk/documents for useful documents including our Rules and latest accounts.

**ABOUT BRIGHTON ENERGY COOP**

Brighton Energy Cooperative’s objectives are to support locally-based renewable energy and energy efficiency. We see increasing support for these measures within the Brighton area, most recently with the popular demand that Brighton and Hove City Council declare a Climate Emergency.

The area is home to numerous environmental initiatives that range from community energy to anti-fracking. The winner of our community fund two years ago, BHESCO, won national acclaim for their work - which we partly supported - on energy efficiency for fuel-poor households.

BEC itself has seen increasing support - we have a growing membership of over 500 people, our website is visited by more than 1000 people a month and have recently won a tender from Brighton and Hove City Council to provide solar PV on up to fifty of the city’s schools.

**BEC IN THE COMMUNITY**

To join visit: brightonenergy.org.uk/product/join
**OUR TEAM**

**Will Cottrell**  
Will founded BEC in 2010 and has been Chairman since. He was Community Energy Fund-raiser of the year 2014, won the Environment award at 2015’s PEA awards and has authored several pieces on developing community energy schemes. Will oversaw the development, fund-raising and installation of BEC’s £480,000 2014 projects at Shoreham Port. He’s also part of Coops UK community energy mentoring programme, mentoring a community energy group in London.

**Damian Tow**  
Damian joined BEC in summer 2010 and was part of the team that subsequently raised BEC’s £18,000 start up capital and £180,000 initial share launch. He oversaw negotiations with BEC’s existing sites, dealing with 50 prospects between 2011-12 and installation of the first set of arrays. He is a director of Brighton’s Eco Technology Show, a freelance sustainability consultant and previously spent 15 years in corporate programme management.

**Matt Brown**  
Matt joined BEC in 2013 and has been heading up New Project Development. He has been a project manager for many years across various technical businesses. Matt has helped BEC take a positive and pro-active approach to developing their renewable portfolio and gain a strong base of generation that will see the Co-op through the next 20 years. He is committed to the concept of community energy and helping BEC’s members to continue the move towards greater community ownership of generation.

**Sue Paskins**  
Sue is a qualified accountant and also served as a Green Party Councillor in Brighton & Hove from 2003-7. She’s a proven record of running successful businesses and has worked in accountancy for various commercial organisations, Sue is also on the Board of Brighton’s Food Partnership. Sue has been a member of the BEL board since 2015.

**Terry Walker**  
Terry Walker joined BEC after retiring as Head of Governance and Company Secretary for Radian Group - a Hampshire-based housing association. He spent many years working as Head of Policy at Citizens Advice and as Corporate Secretary to the Pensions Regulator. He’s a member of the Green Party and a past director of Brighton Jazz Festival and Brighton Housing Trust.

**Peter Davies**  
Peter joined the BEC Board in April 2017 after retiring from Shoreham Port where he was the Development Director responsible for planning, property and the environment. Previously, he was Head of Planning at Adur Council and before that he worked in various economic regeneration roles in the Midlands. He is a Member of the Royal Town Planning Institute and a Fellow of the Institute of Economic Development. While at Shoreham Port Peter was instrumental in developing and delivering a green energy strategy, including the three solar arrays installed and owned by BEC.

**Stefania Rosso**  
Stefania joined BEC in 2012 and now manages the Brighton Energy Coop Community Fund. She has a widespread experience of corporate sustainability project management and as both shareholder and supporter of BEC, she is committed to helping BEC members support other sustainability projects.

**HISTORIC TRADING RESULTS**

We have been trading since 2010: our revenue comes from Feed in Tariffs, and electricity sales - to our host sites and the grid; our operating costs come from running the organisation, maintaining our solar systems, depreciation and paying interest to members. The last five years historical trading figures are in the table below, followed by the next two years, including the impact of our new systems included in this document.

None of the Directors of BEC have, for at least the past five years, received any convictions (for any fraudulent offence or otherwise), or been involved in any bankruptcies or receiverships, or received any public recrimination or sanction by a statutory or regulatory authority or designated professional body, or been disqualified from any function by any court.

Conflicts of interest
The rules of BEC include provisions relating to potential conflicts of interest; related party activities are disclosed and dealt with according to the rules. For further information see our website: www.brightonenergy.org.uk/documents.

Remuneration
None of the directors are paid for their role as Directors but BEC pays remuneration to Will and Damian for providing administrative support to BEC.

Similarly BEC pays Will, Damian and others for project development services, to bring new projects forward. We cost these services at a market rate similar to that which has been paid by comparable organisations. The directors are elected each year at our AGM.
FINANCIAL INFORMATION

Investing for Children
Parents and grandparents can invest in for their children and grandchildren. Interest earned will be paid to the beneficiary named by the investor in their membership application. Shares owned this way are exempt from inheritance tax when passed on.

Share Withdrawals
Shares are withdrawable up to a maximum of 5% per annum of share capital in issue at the end of the financial year. Within this ceiling, individual requests to withdraw will be at the discretion of the Board. The Board may resolve at any time to require any proportion of its share capital to be withdrawn, in which case it shall treat as agreed to be withdrawn on behalf of every member (and not some only) that proportion of the shares held by them (with such rounding to the nearest whole number of that proportion which is a fraction as the Board may determine). All members are deemed to give any consents required to the withdrawal of their shares in this manner.

The scope for being able to withdraw shares in the future will be dependent upon the Society developing a successful business and hence cash flows to pay out share withdrawals or contingent on the Society raising additional capital for the purpose of paying out share withdrawals. In the case of joint investments, all investors concerned must agree to a withdrawal. Shares will be repaid at the original price (subject to comments hereafter).

The Directors of the Society have the right to change the withdrawal facility, or to suspend withdrawals. Similarly the Directors have the right to write down the value of shares, if the liabilities of the Society (and its share capital) should exceed the value of its assets. Members who then withdraw their shares will only receive the written down value of their shares.

The value of your shares may fall and their value will not exceed the £1 per share. Although shares are withdrawable, you may not be able to withdraw the full price you pay for them if BEL does not have funds available at the time you want to withdraw your shares. In some circumstances, the Directors may be compelled to write down the value of your shares. Should you then wish to withdraw your shares, you should expect to receive only their written down value.

Returns to Members
The Society will pay only a sufficient rate of interest on money paid for its shares and may in any one year pay no interest at all. A sufficient rate is determined by the Directors as the rate necessary to obtain and retain the capital required to carry out the Objects of the Society as set out within its Rules.

Voting
Each member has one vote regardless of the size and value of their shareholding. Members are kept informed of developments through the Brighton Energy Co-op website, by e-mails where the member so wishes, by occasional newsletters, annual reports and Annual General Meetings.

Legal Information
This document is issued by Brighton Energy Limited, registered number 31107 R, as a Community Benefit Society incorporated in England and Wales on the 10 November 2010 under the Industrial and Provident Societies Act 1965.

This offer of shares is not regulated by the Financial Services and Markets Act 2000 or subsidiary regulations. The money you pay for your shares is not safeguarded by any depositor protection scheme or dispute resolution scheme. The Society, unlike banks and building societies, is not subject to prudential supervision by the Financial Conduct Authority, nor has it been approved by an ‘approved person’ under section 21 of the above act.

This document does not constitute a prospectus within the meaning of the Prospectus Regulations 2005. These regulations do not apply because there is a specific exemption for community benefit societies that conduct their business for the benefit of the community.

As a member and shareholder of the Society you own the Society. If the Society is unable to meet its debts and other liabilities, you will lose the whole amount held in shares. This may make it inappropriate as a place to invest savings.

Your investment in your share account receives interest but does not enjoy any capital growth. It is primarily for the purpose of supporting the society rather than making an investment. As a Society, the maximum return offered to investors will always be limited.

Nomination option
In the event of the death of a member, the repaid value of the shares will normally be added to the estate for probate purposes. You may elect to nominate a recipient for the value of the shares (but only up to the amount set out in law) and thus (under current legislation) remove the value of the shares (up to the amount set out in law) from your estate for probate purposes i.e. the shares may pass to the nominee outside the Will of the deceased. The nominated property will nevertheless form part of the deceased’s estate for Inheritance Tax Purposes, unless the estate is an excepted estate.

Documents
The Rules of Brighton Energy Limited, application form, latest financial statements and financial projections are available on our website: see www.brightonenergy.org.uk/documents.

Dissolution
In the event of the society’s being dissolved, after paying creditors any remaining surplus would then go to paying back initial investments on a pro rata basis, plus any interest due. Should there be any surplus after this point, it will be distributed to other organisations in Brighton and Hove with similar objectives, as chosen by the members.

DATA PROTECTION

Subject to your consent, BEC may hold your personal data.

You may have:
* downloaded a PDF from our website, or
* expressed an interest in some other way in obtaining information about our current share offer, or
* previously given your contact details to BEC as an investing member, or
* previously given your contact details to BEC as an expression of interest in receiving future information about investment opportunities.

BEC will therefore hold your name and contact details:
* to communicate with you about this share offer
* to communicate with you about your membership of BEC (for example issuing invites to general meetings, or providing information about your investment)
* to communicate with you about future share offers
* to communicate with you about the plans activities and successes of the business

In addition if you are an investing member, BEC will hold bank details for each member for the purposes of making annual payments of interest or repayments of capital.

You may withdraw your consent to your data being held by BEC.

You may amend your consent as to what data is held by BEC and which of the above matters BEC may use your data in connection with.

However, if you are an investing member, you should note that we need to hold your personal data and bank details in order to manage your membership and investment.

**if you have any queries about this share offer, or if you wish to pledge money or request shares, please contact us via our online contact form as this incorporates a statement regarding your personal data in response to which you may give, withhold, or qualify your consent.**

If you are a member, we will be contacting you separately before May 2018 to ensure we have a record of your consent.

If you are considering becoming an investor, or are just interested in learning more about BEC please note that if we do not receive a record of your consent, we will be unable to continue to hold your contact details after May 2018 and therefore unable to give you information about future share offers or BEC activities after that date.
